Re: ISO 11143 – Alternate Models -NSF Project 90008176

Dear Ed,

We have completed the review of the proposed SolmeteX Hg5-001K with Series CC-1MF Collection Container, Hg5-Mini with Series CC-1M Collection Container, and Hg5-Mini with Series CC-1MF Collection Container Amalgam Separator models. The key elements of the review included:

- Determining whether the requirements of ISO 11143 Standard (2008) will continue to be met.
- Determining whether the requirements of the NSF Certification Policies for Wastewater Treatment Devices will continue to be met.

Based on an engineering review, NSF can authorize the above noted model Amalgam Separator Systems.

Please contact me with any questions you may have.

Sincerely,

A handwritten signature in cursive script that reads 'Sharon Steiner'.
