Lead Recycling

Part Numbers:

LB-1	1.25 gallon Lead bucket
LB-A	2 gallon Lead Apron bucket

Waste lead and lead foil are collected and placed into DOT/EPA approved storage / shipping containers for proper recycling. Containers have proper labeling and shipping documents to transport waste for recycling. Generator is supplied with prepaid return shipping container, recycling, and proper documentation.

SolmeteX has developed comprehensive waste services to provide a single source for easy, reliable, economical and environmentally compliant disposal of dental waste.

As with all industries, dental waste disposal is subject to federal, state and local regulatory controls. The ADA, EPA, CDC and OSHA have published recommendations and requirements for the safe handling of amalgam, lead, photo-chemical waste and bio-hazardous wastes.

SolmeteX hazardous waste services can be tailored for multiple waste streams within the dental practice.
