

DryShield® All-in-One Isolation System

ISOLATION • PROTECTION • WORKFLOW • SIMPLIFIED

DryShield®

BENEFITS

- Cut 25-40% in procedure time
- More production AND higher quality of work
- Two-quadrant dentistry increases visibility and reduces chair time
- Protect patients and staff from infectious aerosols
- Clinicians can work more independently
- Hands-free operation allows patients to be comfortable and assistants to multi-task

COMPONENTS

- Cheek retractor improves visibility and protects soft tissue from trauma
- Airway protection prevents aspiration of foreign objects
- Tongue and oral pathway shield keeps tongue shielded and oral pathway protected from trauma
- Bite block maximizes patient comfort (Autoclavable bite blocks are interchangeable to facilitate further size customization)
- Constant suction keeps the work area dry and removes aerosol right at its source
- Easy-to-insert design can be installed and removed from patient's mouth in seconds
- Made from soft and flexible material that contours to the patient's mouth
- System is portable between operatories and offices

Discover the DryShield Difference

DryShield performs all of the tasks of a high-suction evacuator, bite block, tongue guard and oral pathway protector in one easy-to-use device. The patented DryShield system was designed with the dentist in mind, offering total control of your patient's mouth by keeping the working area dry, clean and visible.

It's an intelligent breakthrough in isolation, bringing unmatched levels of ease and comfort to doctors and patients alike. Opt for the cost savings of autoclavable mouthpieces, or the convenience of single-use mouthpieces.

Autoclavable and Single-Use Mouthpiece Options:

- Autoclavable Mouthpieces
- 4 mouthpieces per box
- Autoclavable up to 50 times each
- Removable bite blocks for custom sizing

- Single-Use Mouthpieces
- 20 mouthpieces per box
- Disposable mouthpiece option
- Built-in bite blocks maximize patient comfort
