SolmeteX announces Townie Choice Award for 2012

SolmeteX is proud to announce that *Dental Town Magazine* has awarded the SolmeteX Hg5 a Townie Choice Award in the Amalgam Separator category. The Townie Choice Award is based on end user's satisfaction of products in the dental industry.

"SolmeteX is honored to have received the 2012 Townie Choice Award in the amalgam separator category. The Hg5 has received the Townie Choice since the inception of the award 10 years ago. As the leading amalgam separator manufacture in North America, SolmeteX has consistently provided quality products for the dental industry. SolmeteX has sold more amalgam separators to the dental market than all other separator manufacturers combined. Our commitment to our customers extends with unmatched customer service and support. SolmeteX also provides products for other dental waste such as; scrap amalgam, lead foil, photo chemical recovery and bio-hazardous waste services. This allows the dental practice an opportunity to manage almost all their waste needs directly through their favorite dental supply company. We look forward to our future in the dental industry." said Al Dubé, National Sales Manager for SolmeteX.

For additional information on the Hg5 series of amalgam separators or other product available by SolmeteX, talk to your favorite dental supply company or visit SolmeteX at www.solmetex.com.
