FOR IMMEDIATE RELEASE

SolmeteX announces three regional endorsements in New York State

Northborough, MA — May 8, 2007 — SolmeteX®, Inc. is pleased to announce the endorsement of the Nassau County Dental Society, the Eight District Dental Society and the Queens County Dental Society for the Hg5® Series Amalgam Separator. Following on the endorsement of the New York State Dental Association, these regional endorsements are a strong vote of approval for Solmetex and the Hg5 Series Separator. The Hg5 Series Amalgam Separation Program combines low cost, ease of use and effortless recycling to make amalgam separation as smooth and affordable as possible for your dental practice.

SolmeteX, founded in 1994, is a US company dedicated to the development and manufacture of specialized technology for the safe and economic removal of heavy metal contaminants.

From its Northborough, Massachusetts headquarters, SolmeteX provides leading edge, advanced products, systems, and expert support to a wide range of companies, municipalities, and consumers in the US and abroad to improve environmental quality, surpass health and safety standards, reduce waste stream costs, and meet increasingly stringent legislation regulating the use and disposal of heavy metals.

SolmeteX can be found online at www.solmetex.com.
