SOLMETEX

Supercharge Your Instrument Washing

A 100% enzyme-free, plant- and mineral-based cleaner, PowerSonic effectively removes debris from instruments while reducing ultrasonic bath sludge and odor

Dentistry's hot topics and buzzworthy products are constantly changing, but over the past several years, efforts to boost infection control and protect our fragile environment have taken center stage. Now more than ever, patients and dental teams are increasingly concerned about health and safety in the dental practice, in tandem with a push toward using products that are both safe for and friendly to the environment.

With these two topics in mind, Solmetex created PowerSonic Ultrasonic Cleaner, a general-purpose cleaning solution that features a patented plant- and mineral-based catalytic formula. Using powerful nano-oxygen bubbles, PowerSonic supercharges the action of an ultrasonic bath and instrument washer—all while featuring an environmentally friendly formulation that's 100% free of enzymes.

Advanced Cleaning Action

Suitable for instrument washers, ultrasonic baths, and general cleaning, PowerSonic generates its power from a naturally occurring technology platform that enhances gas transfers, eliminates odors instantaneously, and encourages breakdown of organic waste—essentially “eating up” lingering contaminants.

There are many benefits to integrating PowerSonic into your instrument reprocessing routine, including reduced ultrasonic bath sludge and odor, less rust formation, and rapid protein removal even without ultrasonic action. Additionally, PowerSonic saves valuable operatory space as no mixing is required and there is no need to store multiple gallon bottles.

Available in 1-oz pouch cases or 32-oz bottles, PowerSonic is available for auto-delivery in the Solmetex Compliance Center, which can be accessed 24/7 by visiting solmetex.com/compliance-center.

WHY ADD POWERSONIC TO YOUR CLEANING ROUTINE?

HERE'S 5 REASONS:

- 1 Catalytic cleaning action rapidly removes protein, lipids, and debris
- 2 Immediate elimination of ultrasonic bath sludge and odors
- 3 Plant- and mineral-based formula that's 100% enzyme free
- 4 Ready to use with no mixing required
- 5 Can be aspirated into the suction to support bacterial digestion and remove odors
