

BEFORE.

AFTER.

Isolation. **Simplified.**

DryShield®

PRACTICE DENTISTRY LIKE NEVER BEFORE

95%

of dentists reported that DryShield made it easier to perform restorative procedures

25-40%

reduced chair time on every procedure

82%

savings annually for dentists switching from competitive products to DryShield autoclavable isolation

With more free time and less variability, doctors and hygienists are doing more procedures in each appointment, scheduling more patients in a day, and consistently running their schedules on time. At the same time, patients are enjoying a more comfortable experience as well as shorter appointments.

DISCOVER THE DRYSHIELD DIFFERENCE

One simple device that does it all

DryShield performs all of the tasks of a high-suction evacuator, bite block, tongue guard and oral pathway protector in one easy-to-use device. The patented DryShield system was designed with the dentist in mind, offering total control of your patient's mouth by keeping the working area dry, clean and visible.

It's an intelligent breakthrough in isolation, bringing unmatched levels of ease and comfort to doctors and patients alike. Opt for the cost savings of autoclavable mouthpieces, or the convenience of single-use mouthpieces.

Autoclavable Mouthpieces

1 **Cheek Retractor**

Keeps patient's cheek retracted to improve visibility and protect it from trauma

2 **Airway Protection**

Protects airway from particles and debris

3 **Tongue & Oral Pathway Shield**

Keeps patient's tongue shielded and oral pathway protected from trauma

4 **Bite Block**

Autoclavable Mouthpieces: Interchangeable bite blocks available in multiple sizes to facilitate access and maximize patient comfort for all mouth sizes

Single-Use Mouthpieces: Built-in bite blocks maximize patient comfort

5 **Suction**

Removes water, saliva and debris from patient's mouth to keep your work area dry

6 **Easy-to-Insert Design**

Mouthpiece can be inserted in a few seconds, and removed even faster

Single-Use Mouthpieces

SO MUCH TO LOVE, SO EASY TO USE

What sets DryShield apart?

- DryShield has engineered two options — the Autoclavable and Single-Use mouthpieces — to meet your needs, for maximum affordability or convenience.
- Installation is simple, attaching directly to the HVE — no special equipment required.
- All DryShield mouthpieces are made from soft and flexible material that contours to the patient's mouth.
- Each mouthpiece size features a matching bite block, giving the patient a firm place to rest for a perfect fit in every mouth.
- Hands-free, continuous suction allows patients to be comfortable and assistants to multi-task.
- The DryShield system is portable between operatories and offices.

SEAMLESS, COST-EFFECTIVE INTEGRATION

Fully portable. Installs in seconds.
