

DryShield®

PERFORMANCE EVALUATION

From a study of 100 doctors

1. Procedure Quality

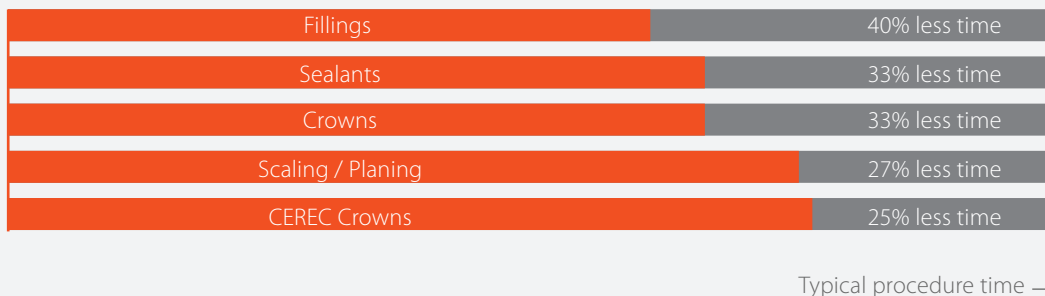

95% of dentists reported that DryShield made it easier to perform restorative procedures while improving procedure quality.

2. Time Savings on Procedures

Procedure times were dramatically reduced - by 25-40% - when using DryShield relative to traditional isolation methods.

reduce procedure time by
25-40%

3. Patient Experience

85% of dentists said DryShield improved their patients' experience by increasing comfort and reducing chair time.

4. Annual Cost Comparison

Upfront costs for DryShield are 61% less than modern-isolation alternatives. DryShield dentists also save up to 82% in mouthpiece consumable costs - every year!
