**Every Drop Matters™**

# Water is the most used instrument in the dental practice.

Utilized in nearly every aspect of patient care, water is the lifeblood of the dental practice. Its purity and safety are paramount. That's where the Solmetex System of Water Solutions steps in, safeguarding the core of your practice while making a positive impact on oral health and the environment.

5.1

Dentistry generates **5.1 tons of mercury water waste** annually.

57K

**57,000 gallons** of water used in the average dental practice each year.

→ **Dental water is a connected system requiring a connected solution, which enhances practice performance.** →
