EXPERTS AT OSAP
RECOMMEND

Sterisil now offers comprehensive water testing solutions through your local dental dealers.

Waterline treatment is only one step in the recurring, multi-step cycle that helps ensure compliant bacterial content in your handpiece water when it matters most. If you don't test, how can you honestly say the **threat** was eliminated?

For over 20 years, Sterisil has been at the forefront of developing **compliance solutions** that mitigate the bacterial threat in dental unit waterlines. Today, Sterisil is proud to offer a complete line of dental water testing products that allow practices to accomplish the entire dental water compliance cycle with one manufacturer. That's the Sterisil advantage.

For more information contact your **Sterisil® sales representative or local dealer.**

*Scroll to Pg. 16 for water quality monitoring recommendations.

The **Organization for Safety, Asepsis, and Prevention (OSAP)** recommends testing monthly until you've attained passing results for 2 consecutive months. Continue to test monthly or reduce to quarterly testing cycles so long as you maintain passing results.

STERISIL Best Practices:

Maintain DUWL Treatment with Citrisil™ Maintenance Tablets [C50-B, C50-W, C50-2B, C50-2W] or Sterisil® Straw [S365, S365m]
