

④ Solution

Evacuation

! The Problem

Inadequate evacuation and suction leads to oral debris accumulation, increased infection risk, and compromised visibility. Controlling aerosol production is crucial for infection control and patient safety and comfort.

⚙️ The DryVac & PowerScrub Solution

- NXT DryVac is a tankless dry vacuum system that provides superior performance with low acquisition costs and virtually no maintenance, all in a compact footprint for easy installation.
- PowerScrub vacuum line cleaner uses microbial action to dissolve vacuum line debris on contact to power up vacuum suction.
- DryShield performs all the tasks of a high-suction evacuator, bite block, tongue guard, and oral pathway protector in one easy-to-use device.
- Compliant - meets EPA "Dental Amalgam Rule"— neutral pH > 6 and < 8

👍 Why it Matters

Effective evacuation and suction are essential for maintaining a safe and clean dental environment. Water conservation is critical to mitigate rising water costs.

57,000

Gallons of water per operatory each year*

Saves Water

Improves Suction

Confident Compliance

Environmentally Friendly

Simplify and improve your dental practice with Solmetex's smart, eco-friendly, and productivity-boosting solutions, ensuring safe water, improved infection control, and enhanced patient care.

PowerScrub® Vacuum Line Cleaner

SmartScrub technology microbial action breaks down stubborn debris treating the source of the problem, unlike other cleaners that lubricate over it.

NXT® DryVac

Superior operational performance with low acquisition costs and virtually no maintenance.

DryShield®

A high-suction evacuator, bite block, tongue guard, and oral pathway protector in one easy-to-use device
