Practice Waste Solutions includes the disposal of all regulated dental waste. Solmetex offers a variety of disposal kits for all sizes and types of dental practices. These waste disposal programs, offered through your local dental dealer, provide the opportunity for your practice to meet all your waste disposal needs from one source.

# Fill it, Ship it, Recycle it. It's that simple.

Solmetex's Practice Waste Solutions line of products are the affordable, one-stop, mail-back solution for *all* your dental waste. Purchase through your dealer with no contract required.

## Solmetex offers the 'Total Solution' for all your Waste Disposal Needs

The new EPA "Dental Rule" requires dental offices to use amalgam buckets, as defined in the ADA's Best Management Practices, for the disposal of all items that come in contact with amalgam. The Practice Waste Solutions Amalgam Bucket by Solmetex fulfills that requirement.

## There are two categories of Amalgam Waste: Wet Waste vs. Dry Waste...What is the difference?

**Wet Waste** — A certified installed NXT Hg5 amalgam separator will capture all the waste and solids sent through your dental water lines before it reaches your vacuum pump. This collection could potentially add 5 years\* to the life of your vacuum.

**Dry Waste** — A PWS amalgam bucket will store contact and non-contact amalgam, spent amalgam capsules, chair-side traps, central vacuum filters and extracted teeth containing amalgam. When full, simply print out a shipping label on Solmetex.com and mail it for proper recycling.
